USE OF THE JEWISH HOLIDAY CALENDAR

This calendar has been prepared to assist teachers and school administrators in scheduling activities such as exams, tests, assemblies, field trips, graduation, sporting events and other school-related programming. Government agencies, performing arts groups and other community organizations will also find this calendar helpful. If you have any questions about scheduling or would like additional information about Jewish holidays or celebrations, please contact the Jewish Community Relations Council by phone at 414-390-5736 or email to elanao@milwaukeejewish.org.

The Jewish calendar has both lunar and solar elements. As such, the date for holiday observances vary from year to year. All Jewish holidays begin at sundown on the evening preceding the holiday. This is also true for the Jewish Sabbath, which begins at sundown on Friday and ends at sundown on Saturday.

Depending on the degree of personal observance, the Jewish holidays and Sabbath might include abstention from regular work day activities, a ban on driving, taking an SAT exam or participation in an athletic tournament.

SHABBAT

The Jewish Sabbath is observed weekly on Saturday. Like other Jewish holidays, it begins at sunset of the prior day – in this case Friday evening – and ends at sunset on

Saturday. Since it reflects God's rest on the seventh day of the week following the events of the creation, Shabbat is considered to be a day different from the work week, dedicated to prayer, reflection and rest.

The Jewish Community Relations Council strongly urges planners, when scheduling weekend events, to understand that observant Jews are unable to participate in secular events occurring between sunset on Friday and sunset on Saturday.
